

**FACULTY PRE-PLACEMENT MEDICAL EVALUATION
(RBHS Newark Campus)**

NAME (please print): _____

HIRING SCHOOL/DEPARTMENT: _____

Please attach this form when submitting the required information, as outlined below.

To ensure confidentiality, please send medical information to:

NJMS Occupational Medicine Service (OMS), 65 Bergen Street, Suite GA-167, Newark, N.J. 07107 or fax 973.972.2904; phone 973.972.2900.

For your protection, as a prospective Rutgers Biomedical and Health Sciences (RBHS) faculty member:

- You must complete and submit the baseline history form found at <http://njms.rutgers.edu/departments/medicine/divisions/gmed/documents/FormHxRU7113.pdf>
- If you have potential patient contact OR exposure to *Mycobacterium tuberculosis* in a laboratory OR to nonhuman primates, you must be tested for tuberculosis (TB) as a condition of employment. Please provide documentation of recent TB testing results in accordance with the University's TB Surveillance policy #100.3.2 at <https://policies.rutgers.edu/sites/policies/files/40.3.3%20-%20current.pdf> or you can be tested in the OMS.
- If you have potential patient contact or laboratory exposure to human cells or tissues, you must complete and submit the Hepatitis B Vaccine Documentation form found at <http://njms.rutgers.edu/departments/medicine/divisions/gmed/documents/FormHBVRU7113.pdf> and be tested for hepatitis B (HB) infection and immunity as a condition of employment. Please provide documentation of serologic screening results (HB surface antigen, HB core antibody, HB surface antibody) in accordance with the University's HIV, HBV, HCV policy #40.3.5 at <https://policies.rutgers.edu/sites/policies/files/40.3.5%20-%20current.pdf> or you can be tested in the OMS
- If you have potential patient contact, please provide documentation of measles, mumps, rubella and varicella immunity or you can be tested in the OMS.
- If you have potential patient contact and/or will need to be fit tested for an N-95 respirator, you must be medically evaluated using a U.S. Occupational Safety and Health Administration mandated health questionnaire and then be fit tested by Rutgers Environmental Health and Safety. Please complete and submit the questionnaire found at <http://njms.rutgers.edu/departments/medicine/divisions/gmed/documents/FormOshaRespShortRU7113.pdf>

Specifically concerning TB surveillance, either a current 2-stage TB skin test documented in mm induration or an interferon-gamma release assay is required, unless you have a history of latent TB infection or a positive TB test. In that case, you must have a focused physical examination and a documented chest x-ray from the past 3 months and be evaluated for treatment if not previously treated. More details are specified in the policy.

If you do not have adequate proof of TB surveillance or of immunity, you can receive the necessary tests and vaccines at the OMS **at no cost to you**. However, you cannot be reimbursed for tests or vaccinations done by your own health care provider.

If you have any questions about the medical evaluation, please contact the Occupational Medicine Service at 973.972.2900. Thank you for your cooperation in completing this mandated medical evaluation.
